

TAKE YOUR INFRASTRUCTURE **TO THE CLOUD**

Get out of the business of buying, owning and managing servers. Public cloud providers are more reliable, easier to backup, and more secure than having on-premise servers in your office.

RedNight Cloud Computing Features:

- Amazon Web Services
- Business continuity
- Data recovery
- Office 365
- Hosted email exchange
- Cybersecurity
- Compliance
- Enterprise architecture
- Mobile device management

THE BENEFITS OF **AMAZON WEB SERVICES (AWS)**

At RedNight, we are excited about partnering with Amazon Web Services to help our clients move to the cloud. With unbelievable benefits and new features being offered, we're able to transform the way you do business.

Simplify Your Infrastructure

With AWS, you are out of the day-to-day business of managing and maintaining servers and other hardware. Instead, you've streamlined your processes and increased your productivity.

Increase Security

With enterprise-level security, AWS gives you peace of mind against cybersecurity threats, and allows you to focus on business instead of on those who try to breach it.

Optimize Your Team

Need mobility? Give your team the ability to securely work from anywhere, anytime with cloud computing. Collaboration with AWS can improve how your teams work together and maximize efficiency with fewer touches per project.

Gain Scalability

Quickly add and reduce resources and applications to meet your changing business needs and demands while managing costs.

RedNight
Migrate. Manage. Empower.
